

Review and top performer logic

How the CRM decides each month's Top Performer and Lowest Performer, what every rating on the Review page is worth, what the optional controls on the Top Performer tab do, and how date filters change what you see.

The short version. Every person is scored against up to twelve criteria for **one calendar month**. Four criteria are read automatically from that month's Review, Attendance and Leaves sheets; the rest are confirmed by a manager. $\text{Score} = \frac{\text{criteria met}}{\text{criteria in play}}$. The highest scorer at **80% or above** is the Top Performer and earns the **\$200** incentive; the lowest scorer, when somebody clearly trails, is the Lowest Performer. Nothing crosses a month boundary: reviews, attendance, leaves, confirmations, switches and the roster are all judged for the month being viewed.

1 The monthly cycle and what feeds it

A review is about the month that has just finished — the sheet filled in during September judges August — so the Review page opens on the previous month.

1 · Month ends

Attendance and the Leaves sheet for the month are complete.

2 · Reviews written

Performance and Behaviour rows keyed in on Review, month picker on the month judged.

3 · Criteria confirmed

On the Top Performer tab: switch on optional criteria, tick what only a manager can vouch for.

4 · Names announced

The two headline cards name the ends; badges beside those names follow across the CRM.

Source	Where it is entered (always for the month judged)	What it decides
Behaviour review	Review → Behavior tab	1 · Exemplary Behavior
Performance review	Review → Performance tab (rating + percentage)	9 · Goal Achievement
Attendance	Attendance → Day Sheet, every day of the month, judged against the Expected Login / Logout on the Staff page	2 · Punctuality, 4 · Timely Login
Leaves sheet	Staff Management → Leaves; rows dated in the month, the <i>Half Day</i> and <i>Late Login</i> columns	Count against 2 and 4
Manager confirmations	Top Performer tab, the chips beside each name — saved per month, shared with every manager	3, 5, 6, 7 and any of 8, 10, 11, 12 switched on
Month settings	Top Performer tab — optional-criteria switches and the Goal Achievement target, saved per month	Which criteria are in play; the % bar for 9

2 What each rating on the Review page is worth

Performance tab → criterion 9 · Goal Achievement

Rating	Criterion 9	Rule
Excellent	Met	On the rating alone; the % is not needed.
Good	Met	On the rating alone, same as Excellent.
Average	By %	Met only if the percentage reaches the month's Goal Achievement target (80 unless changed). Average · 81% is met; Average · 74% is not.
Below Average	By %	
Poor	By %	
No row / blank	? Unknown	Counted as not met .

The percentage is also the **first tie-break** in the ranking, so enter it for everyone. Notes are for the record only.

Behaviour tab → criterion 1 · Exemplary Behavior

Rating	Criterion 1	Rule
Consistent Performance	Met	Any rating other than <i>Low Performer</i> meets it. The five positive wordings are equal for the calculation — they describe the person, they do not score differently.
Good Standing	Met	
Meets Expectations	Met	
On Track	Met	
Satisfactory	Met	
Low Performer	Not met	Criterion 1 always applies, so a Low Performer can never reach 100%.
No row / blank	? Unknown	Counted as not met.

The **Department** tab is the department scorecard; it does not feed the Top Performer. Names are picked from the Staff roster — a row whose name matches nobody is not scored for anyone.

3 How the Top Performer and Lowest Performer are chosen

The twelve criteria — 1–7 always apply; 8–12 only when switched on for the month

#	Criterion	Checked by	Exact rule
1	Exemplary Behavior	CRM · Behaviour tab	Behaviour rating for the month is anything but <i>Low Performer</i> .
2	Punctuality	CRM · Attendance + Leaves	No day of the month ended before the expected logout (one minute early counts) and no <i>Half Day</i> row on Leaves. Needs at least one day with a login and an expected logout to judge; otherwise unknown.
4	Timely Login	CRM · Attendance + Leaves	No login in the month after the expected login (no grace) and no <i>Late Login</i> row on Leaves. Needs at least one day with a login and an expected login; otherwise unknown.
3 · 5 6 · 7	Documentation · Active Participation · Professional Interactions · Written Task Submission	Manager	Met when ticked for the person for this month. Nothing in the CRM records these, so nothing is assumed.
9	Goal Achievement optional · on by default	CRM · Performance tab	Rating Excellent / Good, or percentage ≥ the month's target (80 by default).
8 · 10 11 · 12	Continuous Learning · Collaboration · Innovation · Feedback Acceptance optional	Manager	Count only when switched on for the month; then met when ticked per person.

Expected hours must be on the Staff page. Without an Expected Login and Logout, criteria 2 and 4 are unknown for the person (counted as not met). With the default 8 criteria the most they can then score is 6/8 = 75% — under the 80% bar, so they cannot be Top Performer.

The score

Score = criteria met ÷ criteria in play (whole %)

- In play = 1–7 plus whichever of 8–12 are switched on: 8 by default, 12 at most. Switching one on raises the total for *everyone*.
- Met , not met , unknown . Unknown counts as not met; the CRM never credits evidence it does not have. A manager criterion is met only when ticked.
- 7 of 8 = 88% · 3 of 8 = 38% · 2 of 8 = 25%.

Ranking order

- Criteria met — more first.
- Performance percentage — higher first (none sorts last).
- Share of on-time logins in the month — higher first.
- Minutes late summed over the month — fewer first.
- Roster order, then name.

Equal scores **share a rank number** (1, 2, 3, 3, 3, 6...); the tie-breaks decide only the printed order.

Top Performer \$200

- Take everyone scoring **80% or more** — the Top Performers list.
- The **highest score** on it is the Top Performer and earns the \$200 incentive.
- Several at that score → **all** are named (tied).
- Nobody at 80% → nobody is named ("No one at 80% yet").

Eligible is different: **every** criterion in play met, 100%. The Top Performer is named at 88% even when nobody is Eligible; anyone Eligible is necessarily the Top Performer.

Lowest Performer Low

The **lowest score** of the month (everyone tied at it) — but only when all three hold:

- At least two people were judged.
- Somebody scored better. A month where everyone is at 0% (no reviews, no attendance) names nobody.
- The lowest score is under 80%.

Otherwise the red card reads "No one behind the rest".

A missing review can make someone the Lowest Performer — no rows and no attendance is 0%. Check the "Have a review this month" tile before announcing.

4 Optional fields and controls on the Top Performer tab

Everything here is saved **for the month on the picker** and shared with every manager, except the two display preferences.

Control	What it does
Additional criteria switches (8–12)	Put a criterion in or out of play for the month. Off = greyed out, not counted, not tickable. On = added to everyone's total, so every score drops until it is confirmed — set the switches <i>before</i> ticking. Goal Achievement (9) is on by default and read from the Performance tab; 8, 10, 11, 12 are off by default and confirmed by chip when on.
Goal Achievement target	Number under the switches, default 80 (0–100). The percentage a Performance row must reach for criterion 9 when the rating is Average / Below Average / Poor. Excellent and Good are unaffected.
Confirmation chips (per person)	One chip per manager criterion beside each name. Tap to credit it for that person this month, tap again to take it back; filled navy = credited. Saved a moment later — the word beside the ranking title reads Saved · Saving... · Not saved .
Credit-all chips (column header)	Credit one criterion to everyone currently shown in one tap; if everyone shown already has it, the tap removes it from all of them. Respects the search box and the filter, so narrow the list first.
Re-rank	The first tick holds the order on screen so the person you ticked does not jump away; ranks and scores still update in place. When the order underneath has changed, a Re-rank button appears — press it when you have finished ticking. A month change also restores the true order.
Search	Narrows the list by name or department. Changes nothing but who is listed (and who the credit-all chips apply to).
Only people who pass every automatic check	Keeps only people whose CRM-checked criteria (1, 2, 4 and 9 if on) are all met — the shortlist the Eligible people will come from.
Hide guide · fold panels	Display preferences remembered in this browser only.
PDF (page header)	Exports the ranking exactly as shown — criteria in play, every verdict, scores, incentive mark — as the month's record.

One row of the ranking: rank · person · the four CRM-checked verdicts (hover for the evidence) · the manager's confirmation chips · score · status ("1 to go" — Punctuality failed on an early logout).

5 How date filters affect what you see

A date filter never changes data or results; it chooses **which month's answer** a page shows. The \$200 and Low badges beside a name always belong to one month, and each page takes that month from its own filter:

Page	Its date filter	The month the badges and headline names speak for
Review (all tabs)	Month picker; opens on the month before now.	The month picked. The Top Performer tab re-reads that month's reviews, attendance, leaves, switches and ticks; the name cells on Performance / Behaviour follow.
Staff Management (Staff, Leaves, Salaries)	Month picker on Leaves / Salaries; opens on the month before now.	That month — also for the Top Performer preview panel and the roster badges on the Staff tab.
Attendance — Day Sheet	A single date; opens on today.	The month that date falls in.
Attendance — Staff Summary	Month picker; opens on the current month.	The month picked.
Attendance — Staff Reports	From / To dates with presets.	The month the range starts in.
Dashboard — Staff view	Month picker; opens on the current month.	The review month on the cards — one month behind the picker, like the ratings beside it.
Queues, Users, sidebar	None.	The month before now (the month a review is written about).

The roster is judged as of the month: someone marked Inactive today is still ranked in a past month that holds evidence for them (an attendance day, a Leaves row or a review); Active and On-leave staff are always ranked, at 0% if nothing was recorded. **The current month is provisional:** the picker allows the month in progress, which then rests on partial attendance and usually no reviews — most verdicts are ? and a Low badge can already appear from attendance alone. Treat it as a preview until the reviews are in.

6 Worked example — August 2026 (default settings: 8 criteria, target 80)

Top Performer: Amara Oduya, 88%

#	Criterion	Verdict	Evidence
1	Exemplary Behavior	Met	Meets Expectations
2	Punctuality	Not met	Out 17:30 vs expected 18:00 — 1 early logout of 1
3	Documentation	Met	Confirmed
4	Timely Login	Met	In 09:00 vs expected 09:00; no Late Login row
5–7	Participation · Professional · Written	Met	Confirmed
9	Goal Achievement	Met	Excellent · 95% — on the rating
7 of 8 = 88%: over the bar and highest in the month → Top Performer, \$200. Not Eligible (100%) because of the early logout: "1 to go".			

Lowest Performers: three tied at 0%

Juno Castellanos: Behaviour *Low Performer* (1 not met), Performance *Poor* · 67% (under the target, 9 not met), no attendance day (2 and 4 unknown), nothing ticked. Noor Haddad and Tomas Varga: no review rows, no attendance — every criterion unknown or unticked. Two or more judged, others scored better, 0% is under 80% → all three are named.

In between

Corin Whitlock 38% (3 of 8): Behaviour, Punctuality and Goal Achievement (Average · 81% ≥ 80) met; login 09:14 vs 08:30 fails Timely Login; no chips. Six people share rank 3 at 25%, ordered by the tie-breaks: the two at 95% print above the three at 88%, and among those Benicio Sarto prints last for his 7 minutes late. Kwame Boateng is Inactive today but has an August Leaves row and reviews, so he is ranked for August. Juno's Leaves *Late Login* row does not fail criterion 4 on its own: a Leaves mark only counts against a month that has attendance to judge.

7 Reviewer's checklist

Before opening the Top Performer tab

- 1. **Staff page:** every active person has Expected Login and Logout.
- 2. **Attendance:** the month's days are complete and corrected — a wrong logout time is an early-out.
- 3. **Leaves sheet:** Half Day and Late Login rows entered for the month.
- 4. **Review page, picker on the month judged:** a Performance row (rating *and* %) and a Behaviour row for every active person; names picked from the roster.

On the Top Performer tab

- 5. Set the switches and the Goal Achievement target first.
- 6. Tick per person only once seen; use the credit-all chips for what applies to everybody.
- 7. Press **Re-rank**; read the two headline cards.
- 8. Confirm the status reads **Saved**; export the **PDF**.

Fairness rules of thumb. The same rating means the same thing for everyone — Good and Excellent both meet Goal Achievement; every Behaviour wording but Low Performer meets Exemplary Behavior. A criterion nobody ticks is a criterion nobody meets, so a switched-on criterion must be confirmed for everyone who deserves it. The month is the unit: what happened in July is never read into August.

8 Quick reference

Mark	Meaning	Number / word	Where it comes from
\$200 incentive · \$200	Top Performer of the month the page shows (hover for the month).	80%	The bar for the Top Performers list and the ceiling for naming a Lowest Performer. Fixed.
Low performer · Low	Lowest Performer of the month the page shows.	\$200	The month's incentive, printed on the green badge. Fixed.
Eligible	Every criterion in play met — 100%; row tinted green, rank badge becomes a crown.	Target 80	Goal Achievement target, editable per month on the tab.
·	Criteria still lacking; navy when two or fewer.	8 criteria	1–7 plus Goal Achievement, by default; each optional criterion switched on adds one for everybody.
Criterion	CRM-checked: met · not met · nothing recorded to judge (counts as not met). Hover for the evidence.	Saved · Saving... · Not saved	Whether the month's ticks and switches reached the server; "Not saved" means the last change is only in this browser.
Criterion · Criterion	Manager criterion credited · not yet confirmed.
